The Mladic Judgment:
5 Volumes, Thousands of Pages.

ICTY, MLADIC JUDGMENT, VOL.
IV, 22 NOV 2017, PAGE 2090.

“...The evidence received by the trial chamber did not show that Slobodan Milosevic, Jovica Stanisic, Franko Simatovic, Zeljko Raznatovic, or Vojislav Seselj participated in the realisation of the common criminal objective to establish an ethnically-homogenous Bosnian-Serb entity...”

THE KARADZIC PRECEDENT

(March 24, 2016)

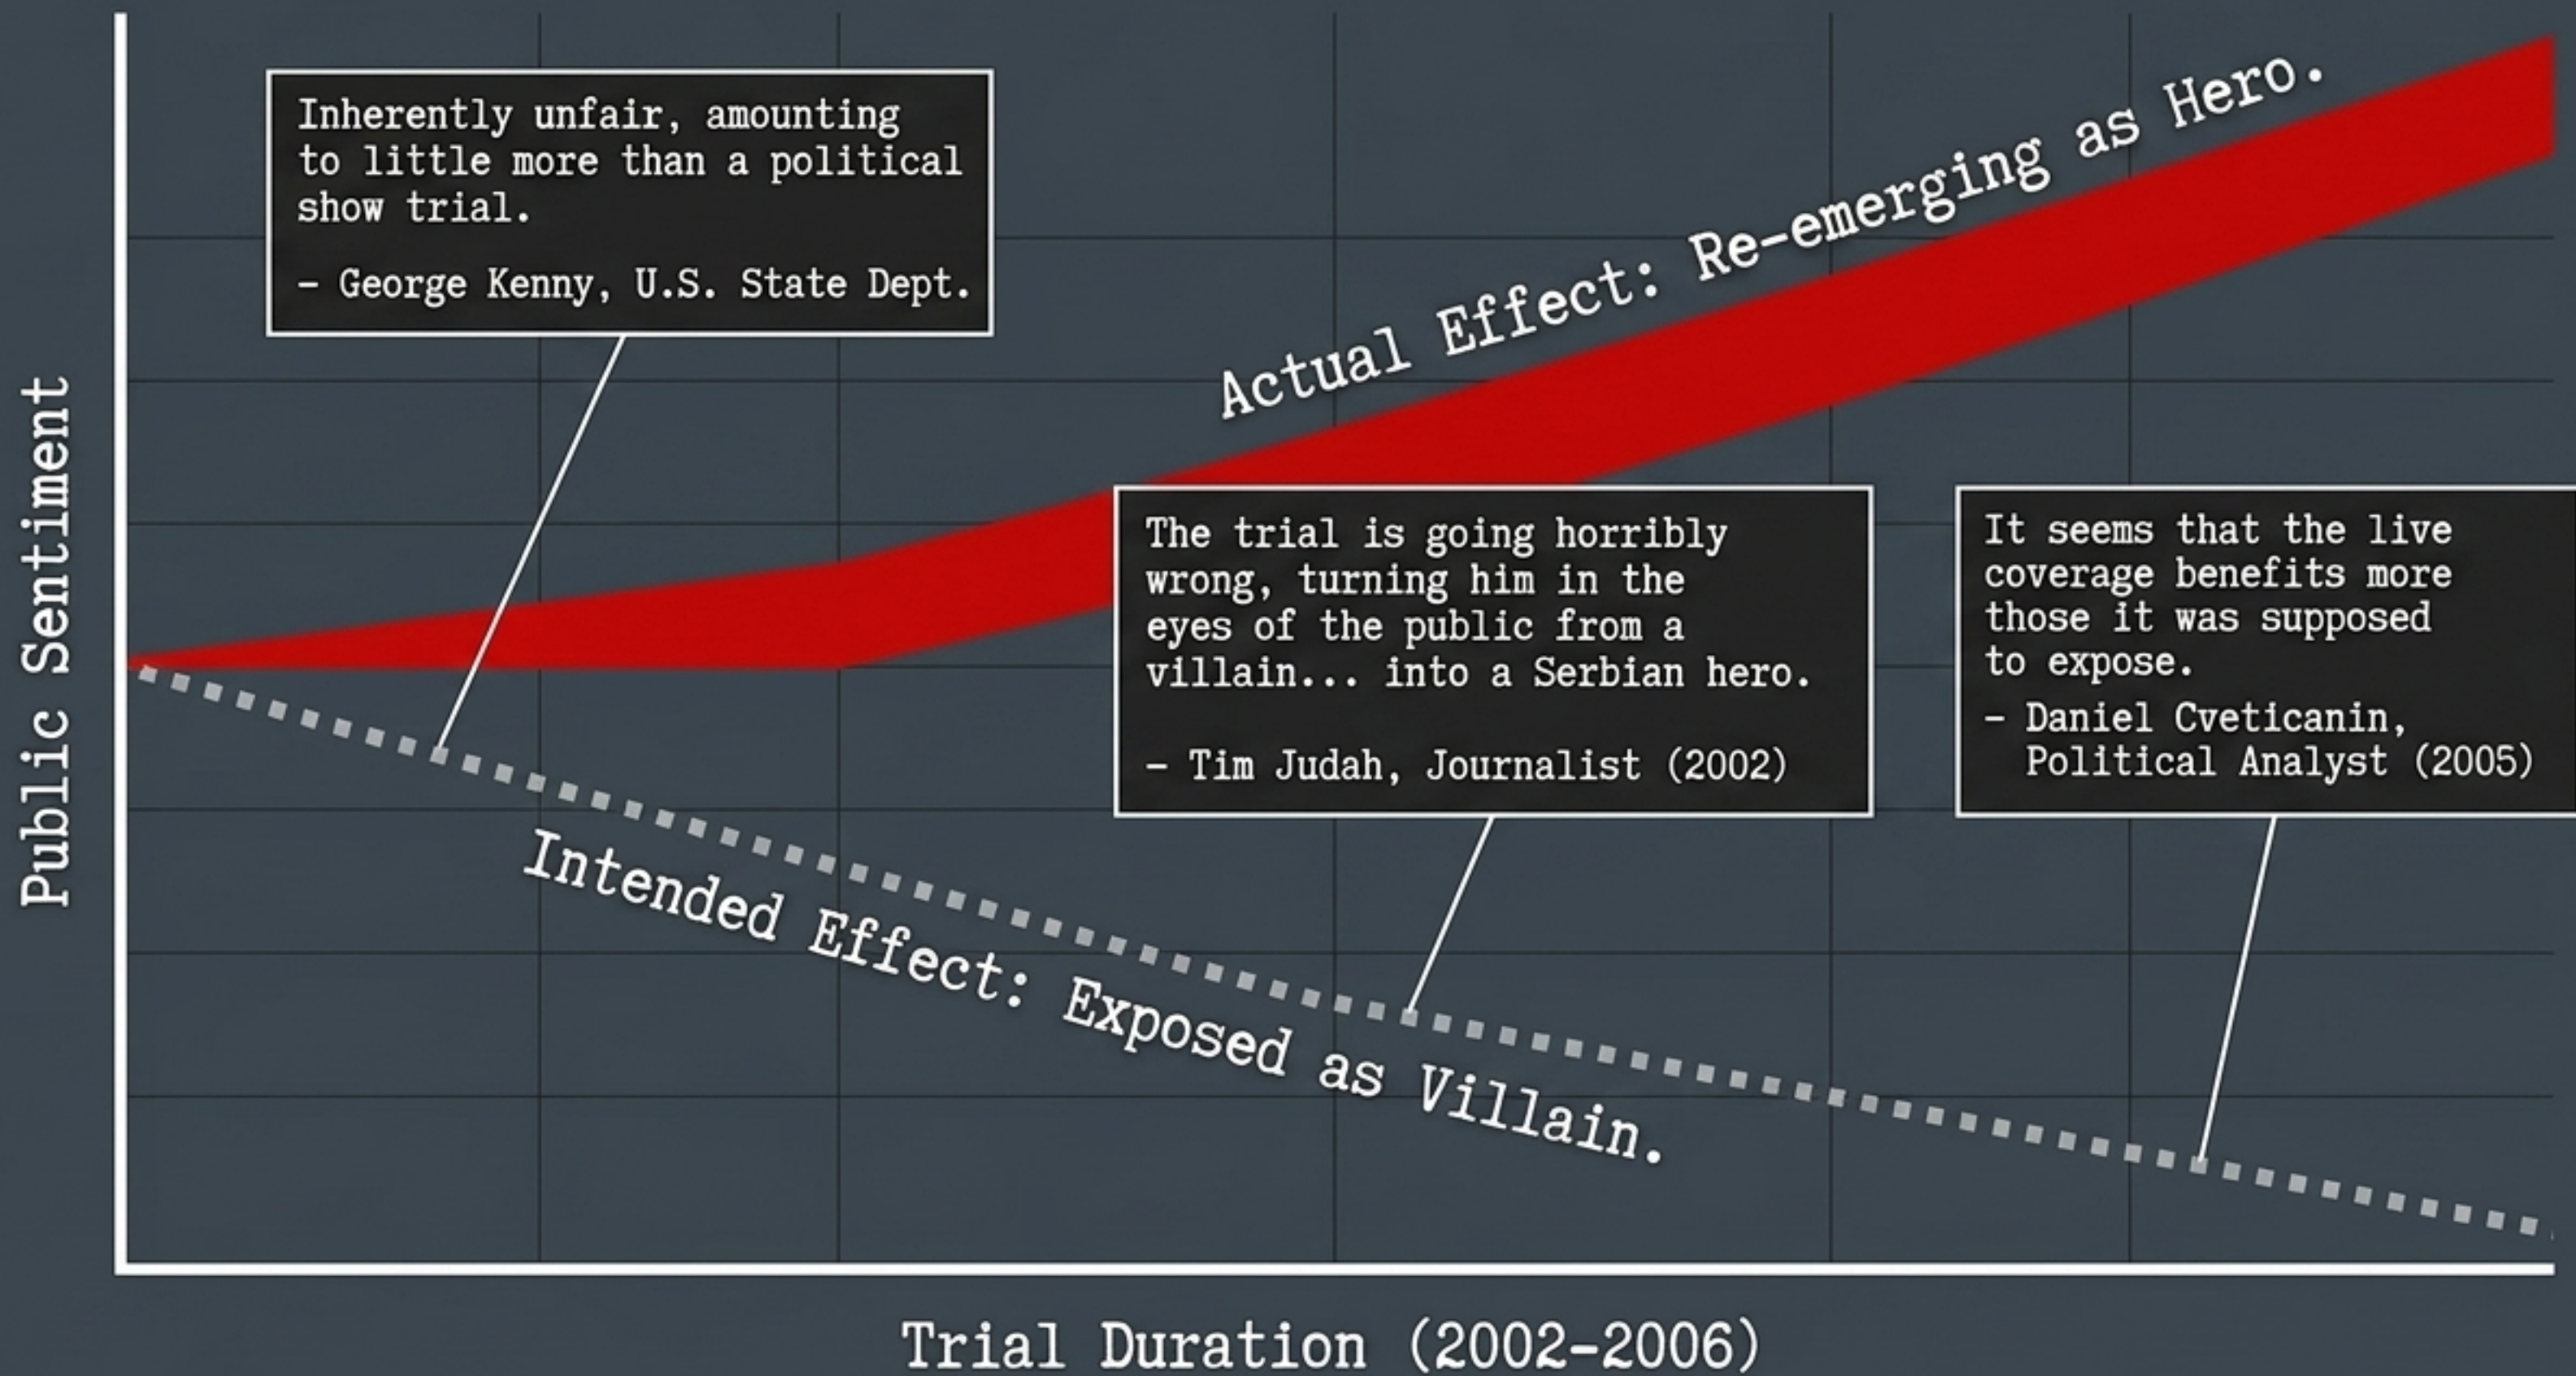

Two successive ICTY trial chambers quietly concluded Milosevic
was not guilty of the core crimes for which he was indicted.

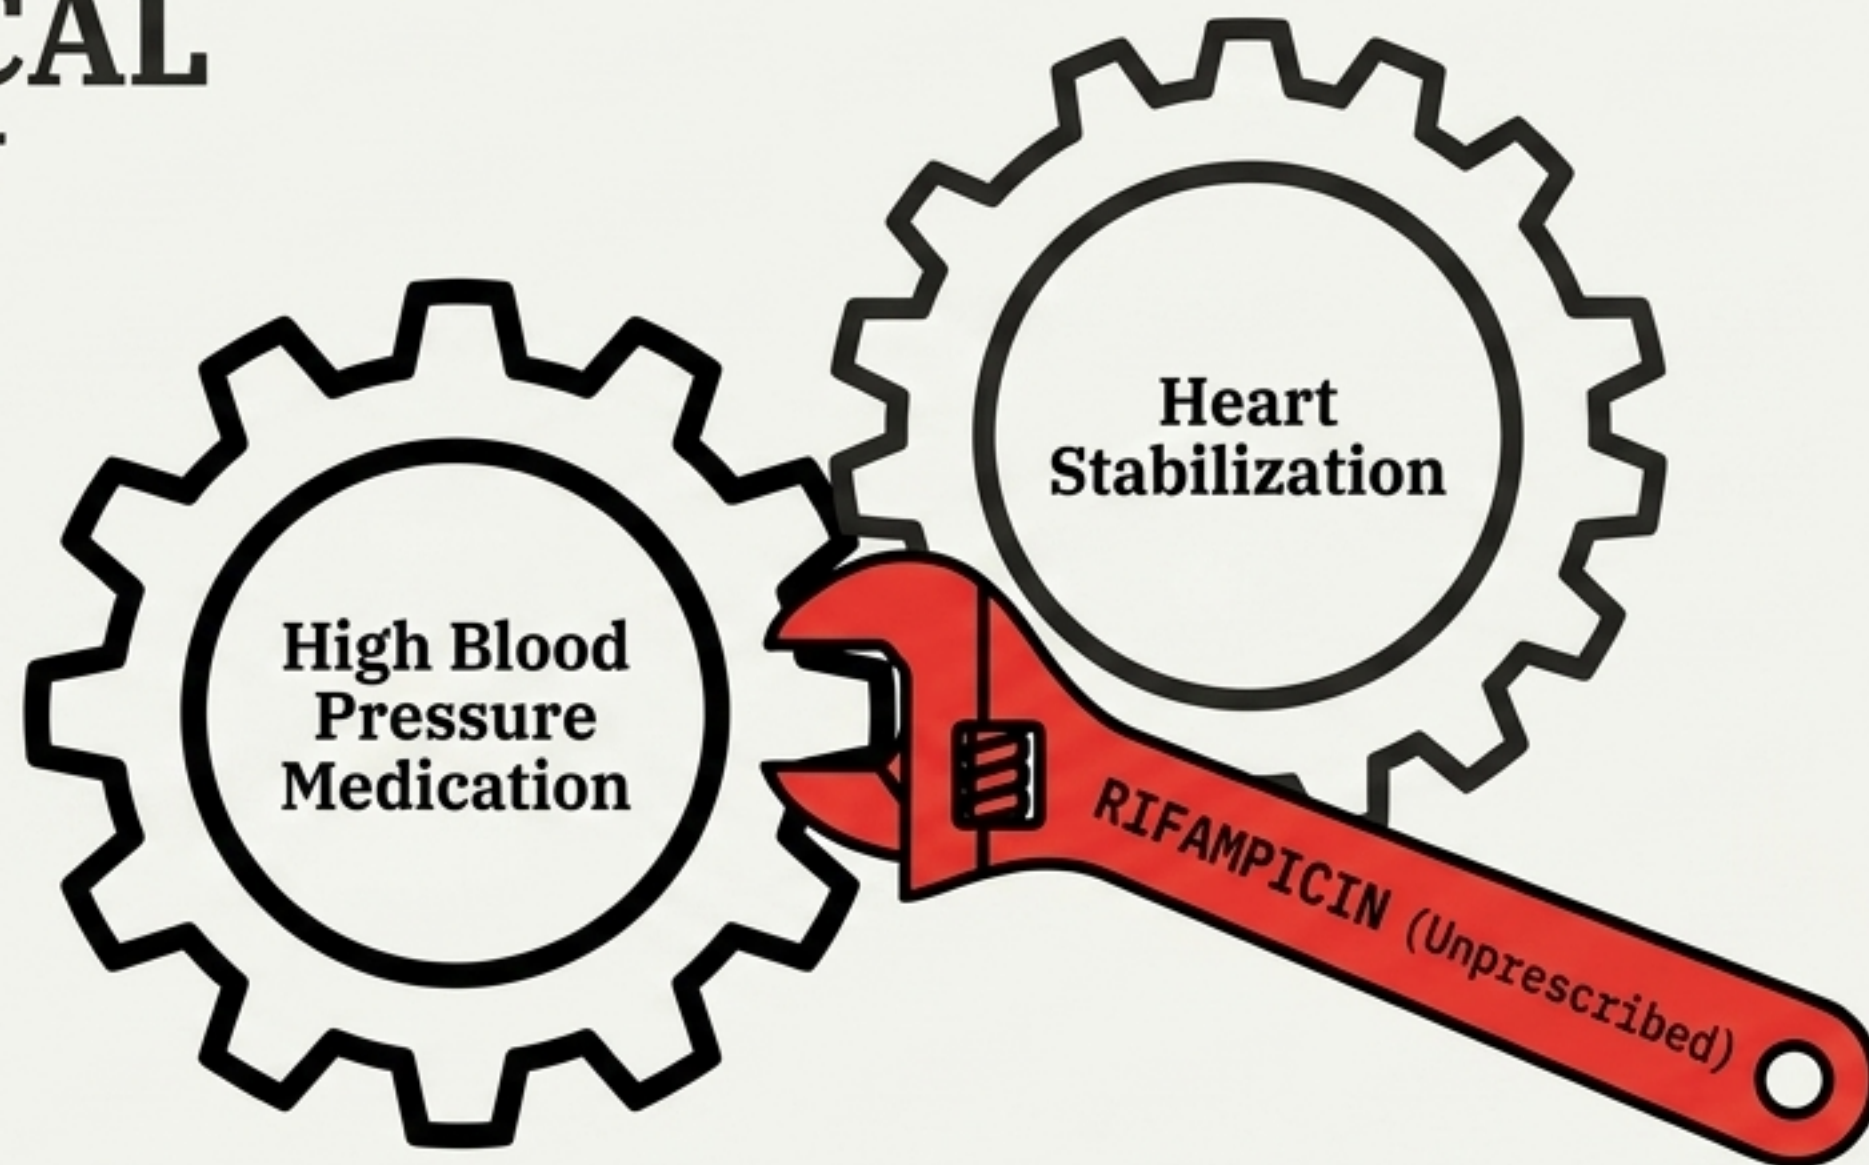

“...the Chamber is not satisfied that there was sufficient evidence presented in this case to find that Slobodan Milosevic agreed with the common plan [to permanently remove Bosnian Muslims and Bosnian Croats].”

ICTY, Karadzic Judgment, Paragraph 3460.

THE MEDICAL ANOMALY

The Tribunal's own inquiry confirmed that Rifampicin—an unprescribed drug known to severely compromise the efficacy of high blood pressure medication—was found in Milosevic's blood tests.

The result of this blood test was withheld from Milosevic for months by the Tribunal's chief medical officer, Dr. Falke, supposedly due to Dutch medical confidentiality laws.

THE TRIBUNAL'S CLAIM

Dr. Falke claimed he could not inform Milosevic of the Rifampicin in his blood due to the difficult legal position... by virtue of the Dutch legal provisions concerning medical confidentiality. (Judge Kevin Parker Report, ¶ 31, 76)

The Tribunal maintained a public stance of strictly protecting patient privacy.

THE DOCUMENTED REALITY

There are no Dutch laws prohibiting a doctor from giving a patient their own blood results.

U.S. State Dept. Cable #03THEHAGUE2835_a reveals the ICTY freely shared detailed information about Milosevic's health and medical records with U.S. embassy personnel in The Hague without his consent.

Milosevic requests provisional release for life-saving heart surgery in Russia.

Less than 72 hours before death: Milosevic's lawyer delivers a letter to the Russian Ministry expressing fear his client is being poisoned.

Tribunal Inaction & Outcome

ICTY officially denies the request. (Case No. IT-02-54, Feb 23, 2006)

Milosevic found dead in his UN Detention Unit cell of a heart attack.

If Milosevic was taken to any specialized Russian hospital... he would have been subjected to coronographic examination, two stents would be made, and he would have lived for many long years to come. – Dr. Leo Bokeria, Coronary Specialist

THE GEOPOLITICAL CALCULUS

LEGAL COLLAPSE:

Exoneration on
Genocide.
Intelligence and
internal legal
findings proved no
link to Srebrenica
or a common
criminal plan.

PR DISASTER:

The Show Trial
Backfires.
Live broadcasts
failed to paint
him as a villain,
solidifying him
as a popular
hero.

MEDICAL SABOTAGE:

Unprescribed
drugs
administered, test
results hidden,
and life-saving
Russian medical
intervention
blocked.

A verdict of acquittal would have invalidated the primary rationale for crippling economic sanctions and a massive NATO bombing campaign. Milosevic's death before the conclusion of the trial became a structural necessity for Western geopolitical interests.
